

**CHINA TOP PLASTIC INJECTION MOLD MANUFACTURER**

Founded in 2006, EX MOULD Co., LIMITED Ltd's the industry leading supplier of custom Injection Moulding from China! With over 10 years experience in manufacturing Plastic Molded Products, we provide professional **Plastic Injection Mold Service** from consulting, designing, prototyping, being one of the top-grade injection mold makers and manufacturers for a wide range of industries. Our injection molding process involves top-class and commercial-grade plastic end-use molded parts, custom prototypes, rapid injection molds and more, while cost and time-efficient low or mass volume production are always be provided to customers around the world! Send us your drawings and inquiry now, we will give back you **100% quality guaranteed injection molds!**

**WHAT IS PLASTIC INJECTION MOLDS?**

**Injection molds** refers to "the tooling for producing a wide variety of plastic parts".

By injecting molten materials into a plastic mold to give plastic products complete structure and precise dimensions, thus plastic components are created and manufactured quickly, from plastic trinkets and toys to automotive body parts, cell phone cases, water bottles, containers and essentially many of the plastic parts that we use in every-day life.

**DESIGN**

- Packaging Mould
- Hot Runner Mould
- Resin Mould
- Silicone Mould
- Blow Mold
- Soft Plastic Mould
- Over Mould
- Insert Mould

**Services**

**What is Plastic Injection Molding/ Moulding Services**

Plastic injection molding services is a widely applied manufacturing method for mass production needs of finished plastic parts, which using the injection molding machine, with the molten material forced into the required mold and obtain the final plastic products in mould shape. The flow plastic would cool and harden in the mold cavity and form the final shape, then the product will be ejected. The plastic injection moulding services generally avoid the secondary processing and make lots of profits. A host of complex plastic injection molds takes critical part in the process.

**Materials**

- Carbon Fiber Injection Molding
- PTFE Injection Molding
- PLA Injection Molding
- ABS Injection Molding
- PVC Injection Molding
- Polycarbonate Injection Molding
- Polyester Injection Molding
- Polyimide Injection Molding

**Industries**

- Plastic Bottle Molding
- Bumper Molding
- Medical Molding
- Automotive Molding

**WHY US?**

- Professional Team Whether injection mold design or prototype, our specialized moulding team can help you.
- Quality Craftsman ship Trained machinists, advanced equipments, certifications ensure injection molds are crafted carefully.
- Customized Production Low or mass volume production, we'll turn your design into fully rapid injection molding.
- Cost Efficient Competitive price, rapid injection molding with low overhead, great added value to customers.

**OUR MANUFACTURING FIELDS**

- Plastic Injection Molding**  
From single-function precise injection molding, professional and complex aluminum metal injection mold design and manufacturing, to the production of small and high volume injection molded products and foundry manufacturing, GMB offers high-end diversified injection mold processes and services.
- Injection Molds and Tooling**  
Our experienced injection mold design team has been designing and manufacturing the best metal molds and production tools for plastic injection molding companies in various industries to help customers achieve high-speed, high-quality production in their markets.
- Injection Molded Plastic Products**  
With extensive experience in the injection of complex parts requiring high precision and high precision, GMB offers a wide range of sizes and types of plastic injection molded parts and foundry manufacturing, such as daily necessities, medical and automotive parts.
- Plastic Injection Mold Technique**  
Depends on the part geometry, tool design, production volumes and budget, a variety types of injection molds can be designed and manufactured to suit the different injection molding process needs of the customer, including the cold runner, hot runner, insert, blow mold, etc.

**OUR PRODUCTS**

- Injection moulding tool
- Plastic moulding die
- Plastic injection mould
- Customized injection mould
- Diy mould tool
